Draft HSC meeting Summary Report 200520.docx
Prelimanary forecast of COVID-19 in the EU EEA and UK.pdf

Beste allen,

Afgelopen woensdag was er weer een HSC audio meeting, bijgevoegd het verslag. Aan alle actiepunten van het overleg is inmiddels voldaan, er zijn dus geen nieuwe actiepunten. Onderstaand een samenvatting van de belangrijkste punten:

1. **ECDC 30 days forecast (Bijgevoegd)**
   ECDC introduced the updated preliminary forecasts of COVID-19 in the EU/EEA and UK for the next 30 days. Following previous discussions in the HSC (regarding the methods and data used / utility of data), the ECDC has been working with national modellers and consulting the relevant networks of experts. Some countries asked that datasets are confirmed, and noted the uncertainty of different models in relation to the effectiveness of the measures. [redacted] noted the possibility of political level confirmation at the upcoming health ministers meeting on 25 May. ECDC will continue discussion with the different modelling groups at national levels; add more information to the report regarding modelling.
   - Follow-up: The HSC to send comments to the Commission on the data sources and modelling by 22 May, which will be transmitted to ECDC (RIVM heeft intern uitgezet bij modelleurs / [redacted])

2. **Exit strategies**
   Countries [redacted] provided an update on de-escalation measures, the opening of schools is being closely monitored without significant impact observed so far. Low infection rates among children were also noted by SE, where schools are kept open. DE observed several hot spots in the last week, mainly in smaller communities, and isolated clusters in different areas. ***Outbreaks in slaughterhouses*** are being addressed, recognised as complex problems related to working conditions and other factors.
   - Follow-up: The HSC continues to exchange information on de-escalation measures and the impacts of those measures in details. The HSC to share information on the used indicators and next steps planned for gradual reopening (Eerder geleverde input door NL nog up-to-date)

Groet, [redacted]
