Subject: RE: new question (10)(2e)

Dear (10)(2e)

I just received the answer from (10)(1c)

Following are the lysis extraction/isolation kit that (10)(1c) recommend to use with their testkit:

Specimen	Kit name	Manufacturer	Cat. No.
Swab, Sputum	(10)(1c)	QIAGEN	(10)(1c)
	(10)(1c)	QIAGEN	(10)(1c)
	(10)(1c)	Ambion	(10)(1c)
	(10)(1c)	Roche	(10)(1c)

(10)(1c)

(10)(1c)

According to the Korean medical industry association website, Bioneer (<https://eng.bioneer.com/c-diagnostic/c-diag-human-diagnositcs-kits/covid-19.html>) sells both lysis extraction/isolation and PCR kit as well. The company even supplies RT-PCR instrument of their own. However, the PCR kit of this company is only approved for export and not used in Korea yet.

Best regards,
(10)(2e)

Subject: RE: new question (10)(2e)

Thank you very much (10)(2e), I forwarded it. In the meantime I was wondering, are there any other Korean brands that have the possibility of combining lysis extraction and PCR? In the meantime, I hope they make up their mind in the NL soon...
Regards, (10)(2e)

Subject: RE: new question (10)(2e)

Dear all,
0112d the quantities that the Netherlands is considering to (0043) and wait for the response for possible weekly supply. (19483

questions on their testkit (<http://www.> (10)(1c)) are answered as following:

- 1) (10)(1c)
- 2) (10)(1c)
- 3) (10)(1c)

(10)(2e) (10)(1c) The list was already provided with link (<https://www.khidi.or.kr/board/view?pageNum=1&rowCnt=20&no1=3199&linkId=48825484&refMenuId=MENU01499&menuId=MENU01498&maxIndex=00488254849998&minIndex=00488158169998&schType=0&schText=&schStartDate=&schEndDate=&boardStyle=&categoryId=&continent=&country>) and recommendation from (10)(2e) and me last Friday: Bioneer, Ahram Bosystems and Osang. For large quantity supply, I think we're a bit late so we need to wait in the line.

Best regards,

(10)(2e)

Sorry, I made a mistake in translated text : it should be 'quiagen' and not 'wilgen' in last sentence.

Regards, (10)(2e)

Subject: RE: new question (10)(2e)

Dear (10)(2e) and (10)(2e), this is what I got back:

Ik ben geïnteresseerd in vanaf minimaal 15 k per week - mogelijk 35k per week en 70 max

Ergens in die bandbreedte denk ik

Afh wat voor test het is

Lysis extractie isolotie per in 1 test

Draaien op Roche machines

Liefst MP96

Evt roche 6800 of 8800

Evt evt evt op machines van qiagen en biomerieux

Translated:

0043

19483

"A minimum of 15K per week, possibly 35K, up to 70 K per week."

Also depends what type of test. If it can run on the Roche machines, preferably type MP96, but Roche 6800 or 8800 also possible.

And perhaps, machines of wilgen and biomerieux.“

Is this something you can work with? Pls let me know if you need more..

Subject: RE: new question (10)(2e)

Dear (10)(2e) and (10)(2e)

The information requires more detailed answer so I will call the number sent from KOTRA today. This is a good sign but the question still does not have how "many" test kits the Netherlands needs.

Best regards,
(10)(2e)

Subject: FW: new question (10)(2e)

Dear (10)(2e) and (10)(2e),

Another question from (10)(2e) would be great if you could find out the answer today? I translated (10)(2e) question as follows:

Authorities in the Netherlands are interested in (10)(1c)s kits that do lysis extraction isolation and pcr (so called extended pcr) .

Would (10)(1c) be able to deliver many test kits to the Netherlands weekly, test kits that function without problems on our Roche MP96 machines, and do they know that for sure?!

Thanks for your help!
Regards, (10)(2e)

PS. It looks as if we are getting closer to what we need. Do we have a contact with (10)(1c)? And are there any impediments for them to export to the Netherlands?

Nederlands:
Zou (10)(1c) veel testen op wekelijkse basis kunnen leveren EN passen die 1 op 1 op de Roche MP96 machines EN weten ze dat zeker? en dit gaat om kits die lysis extractie isolatie en pcr (zeg maar uitgebreide pcr) kunnen doen
