10.2.e

Zie onder. Betreft offerte voor tweede machine uit Taiwan.

Vraag van ASML is of wij akkoord zijn met doorgeleiding van deze offerte aan DSM.

Ik zie geen bezwaar, vooral niet nu Berry Global duidelijk te kennen heeft gegeven geen interesse te hebben in de Taiwan optie. Mochten zij besluiten te investeren in PPMB productie in NL dan willen zij opteren voor machines van hun vaste leveranciers (uit D en V.S). nemen daarbij langere levertijden dan voor lief. Eerlijk gezegd kreeg ik gisteren in telco met Berry Global Cuijk de indruk dat zijn hun plannen wat op een lager pitje hebben gezet.

Akkoord om offerte door te sturen aan DSM?

*** VERTROUWELIJK ***

10.2.e,

Zie onder en bijgaand. Dit is de optie voor de 2^e MB PP productielijn. Vanmorgen uitgebreid besproken met 10.2.e van DSM. We willen snel schakelen op deze leads, anders kan het negatieve impact hebben op lead-times voor de machines.

Echter, we willen EZK on board hebben hierbij en niks doorzetten naar DSM zonder dat jullie hiervan op de hoogte zijn en het e.e.a. ondersteunen.

Graag overleg hierover. Ik bel je zo weer even.

Groet,

10.2.e

Subject: FW: additional information request

Hello 10.2.e,

See attached quotation as received from TTRI. Can you please discuss with EZ if this can be released to DSM? If yes can you please proceed accordingly?

Best regards,

10.2.e

CAUTION: This message is from an external sender

Dear 10.2.e,

Please the attached quotation.

The photos you requested are not available.

The total weight of the meltblown production line is about 8 tons.

The cooling water machine for extruder is included.

Best regards,

10.2.e

Subject: additional information request

Dear 10.2.e, 10.2.e

Again I would like to express my appreciation for arranging the visit the factory earlier today,

A lot of technical system installation information has been shared with us and also photos of the "1.3 meter MB PP line" which is installed in China has been shown.

I am preparing my final report for tomorrow to be released to the Netherlands and for this I would like to request if you can provide me:

- Photos of the 1.67 meter MB PP line which you have send to Russia. Purpose is to ensure the end—users in the Netherlands that 1.67 m configuration is operational at customer side.
- Photo(s) of corona / charging station
- Photo(s) of fabric cutting line.
- What is the floorloading (kg / m2) of the system?
- Besides electricity, does the system require cooling water (city water?) or any other facilities not mentioned before?

Looking forward to your feedback and official quotation,

10.2.e
