We had the first positive results in flies tested this week.
[16-10-2020 08:09:06] 10.2.e
                                             Nope we did not test that, I am not
surprised when you find it in dust that you also find it in flies. I would be
surprised when it replicates in flies. Do you know the CT values?
We are going to test birds and other wildlife and do some work with night
cameras etc.

[04-11-2020 06:38:57] 10.2.e
participation in the meeting today. This is confidential: Today primeminister
will annonce stop for minkproduction in DK. All farms will be culled. The
defence minestry Will take over. 11.1????
So far and since 8 oct 140 farms are culled and 70 is in process. We have done
that working with the farmers. But it needs to move faster. Reason is a
preliminary study in virus from one person but the Health authorities has
decided to go with it. I Will try an get in contact with you later
[04-11-2020 06:41:54] 10.2.e
Have been thinking of you a lot lately.... what a difficult time for you. I
understand completely, do what you need to do and we will get in touch later.
Did you find something important in this person? We have at least 66 people
infected related to farms, not sure whether mink-human or human-human.
