Onderwerp: FW: Flash report of the HSC audio meeting - 27-01-2020

Hoi

Zie hier ook hetgeen jaap zei:

ECDC said that in future risk assessments there would be an effort to make clearer those areas with sustained chains of human-to-human transmission and places, which have only imported cases. ECDC is working to gather the fullest information that is available and will modify future risk assessments based on what new information arises. Regarding the reports in the media of the possibility of transmission of the infection by people who are asymptomatic, this conclusion needs to be supported by additional information. Currently this possibility is suggested from one case in a family reported in the Lance and a statement by a Chinese official without any further scientific evidence.
