Ter aanvulling op ons telefoontje:

[(10)(2e)] deze zin kwam van de CN Ambassadeur:

I would like to point out that although the World Health Organization has recently declared the 2019-nCov epidemic a "public health emergency of international concern (PHEIC)", the measures taken by the Chinese government to fight against the epidemic is highly recognized by WHO and the international community, which has full confidence that China will win this battle. And WHO also specifically advised against any travel or trade restrictions. The Chinese side highly appreciates the calm and reasonable attitude of the Dutch side on epidemic prevention and control so far. China is willing to work together with the Dutch side in this regard, and we hope the Dutch government will not take unnecessary restrictive measures against China and Chinese people like the US does, which will not be in the benefit of both sides.

[(11)(1)]

En bijgesloten het verhaal over Philips en nog een keer de stand van zaken per vandaag 15:15 uur

Best regards,

[(10)(2e)]
