Onderwerp: RE: Joint procurement of personal protective equipment - reply by 6 February 2020

Hoi,

Ik heb 10)(2e) net gesproken. Hij kent de betrokkenen goed en denkt dat het wel oké is als we vandaag niks insturen. Maandagmiddag belt hij me om het verder te bespreken.

Groeten, (10)(2e)

Hallo (10)(2e)

Heb jij tijd om hier vanmiddag telefonisch over af te stemmen – hoe laat?

m.vr.gr.

Subject: RE: Joint procurement of personal protective equipment - reply by 6 February 2020

Dear [REDACTED]

Thank you for your e-mail and for your tentative interest in this joint procurement. Please find our replies below.

We are collecting the needs not based on sets, but on different types of commodities (e.g., masks, gloves, gowns, etc.). Both ECDC and WHO have produced relevant disease commodity packages/definitions, which may be useful:

- <https://www.ecdc.europa.eu/en/publications-data/personal-protective-equipment-ppe-needs-healthcare-settings-care-patients>
- [https://www.who.int/publications-detail/disease-commodity-package---novel-coronavirus-\(ncov\)](https://www.who.int/publications-detail/disease-commodity-package---novel-coronavirus-(ncov)).

We suggest to indicate your needs in single units/pieces, because the ultimate packaging options may indeed differ across manufacturers. We are not aware of a minimum order quantity.

Given the context and evolving situation we have indications that the usual market prices have significantly increased (up to 20 times compared to the historic prices), yet that would definitely be influenced by the quantities. For example, historically, we could see a price range for disposable FFP2/3 masks from EUR 0,7 to EUR 3,5, while currently retail prices range from EUR 10 to EUR 20. Yet, this is purely indicative, our market research is still ongoing. As an alternative, it might be interesting to consider reusable masks. WHO does not specify if FFP2/3 respirators should be disposable or reusable, it seems that the market demand is not so high as for the disposable masks, it might be a more sustainable solution, and the known production sites are not affected by the outbreak zones.

We are expecting countries to provide with their ultimate decision and needs' assessment by the end of this week.

Please treat this information in a confidential manner on a need-to-know basis and exclusively for the needs of the coordinated response to the coronavirus threat. Therefore, may we kindly ask you not to distribute or share the information otherwise.

Kind regards,

for the Joint Procurement Team

(10)(2e)

Subject: RE: Joint procurement of personal protective equipment - reply by 6 February 2020

Dear team,

Before we can make our final decision please be so kind to provide us following information:

- For the need-analysis do we indicate in units – but does a unit consist of one set of equipment, ten sets per unit? In other words are we dealing with single packs or multiple packs. What is the minimum order quantity?
- We have not been involved in the Ebola protective equipment joint procurement, so our knowledge is limited – where does one set of protective equipment consists of? Can you provide some basic info so that we know what we would buy?
- Any idea of pricing (will be treated confidential!) based on your Ebola experience?
- What is the ultimate deadline for our decision in order to still be able participate in this project?

Thanks for your reply,

Best regards,

(10)(2e)

Dear [REDACTED] (10)(2e)

Just to inform you that the Netherlands is considering to participate in this procedure. We are in the process now to assess if there is a need for this equipment and if yes what quantity would be involved. We will let you know asap what our final decision will.

Best regards,

[REDACTED] (10)(2e)
