Subject: Commentary COVID-19 - Mitigation strategies

Dear (10)(2e)

Attached is the commentary on mitigation strategies for COVID-19. It is a little long, but I am sure your expert editorial staff can reduced its length.

We believe the issues raised, and the consequences of various actions, are very pertinent at present given the UK governments move from Contain to Delay (flattening the epidemic and pushing it out to the right) as a result of advice from the SAGE.

I do hope it might be possible to get a rapid publication time.

All best wishes,

(10)(2e)
