Dear [REDACTED] [REDACTED] [REDACTED]

In addition to our COVID-19 antibody ELISAs (for IgA, IgG and IgM) we have recently launched a CE-marked RT-PCR as well as a lateral flow rapid test. I attached some information for these new parameters to this mail.

Currently we are looking for external study sites who are interested in conducting a study / trial of our test system. We are highly interested in your feedback in regards to the performance of our diagnostic test systems.

Are you interested in having a closer look on our diagnostic SARS-2 solutions? We would be happy to provide some kits for you and to start a discussion on how to establish a cooperation between us.

Looking forward for your feedback

Thanks a lot and best regards
