

**TO WHOM THIS MAY CONCERN**

Curaçao, May 8th 2020

Ref: (10)(2e) (10)(2e)

LS,

Curaçao has approximately 160.000 inhabitants and thus far there is only 1 intensive care (IC) medical specialist (intensivist) on the Island. For a proper IC care, the Islands needs at least 3 intensivists.

(10)(2e) born (10)(2e) in (10)(2e) was since June 2019 in the process of coming to work with us on a permanent basis at the hospital in Curacao. Unfortunately, we had to wait until all the paperwork regarding permission to become a citizen and to work were completed. While waiting for everything to be arranged we were working with replacements from abroad and (10)(2e) helped us out on the regular basis for weeks.

Recently, all (10)(2e) paperwork was finalized by our government, but unfortunately just after the borders were closed due to Covid-19 pandemic, impeding (10)(2e) to fly over to Curaçao. (10)(2e) had to start as the 2nd intensivist at the Curaçao Medical Center per May 1st, as dictated by his contract.

We would really appreciate if he gets the permission to fly over and start working with us.

Hope to have informed you accordingly,

Sincerely yours,

on behalf of (10)(2e) (10)(2e), (10)(2e)
