

I. Existing supply

SLI.DO code: #CCH

Most MS indicated that they are measuring their own supply of PPE, ventilators, test kits and medical equipment. How is this monitoring done? (SLI.DO)

- a. Regular surveys
- b. Ad hoc contacts with industry
- c. Commercial databases
- d. Statistical offices
- e. Other

More specifically, are you monitoring the supply of the following medical equipment in your country? (SLI.DO)

Sli-do options:

- Test
- Test materials (laboratory materials, sample consumables, reagents)
- Masks
- Gowns
- Shoe covers
- Gloves
- Medical devices
- Medical devices' components and accessories

For which products you currently have domestic production? (SLI.DO)

- Testing kits
- Test materials (laboratory materials, sample consumables, reagents)
- Surgical masks/FFP masks
- Non woven
- Non woven machinery
- Gowns
- Goggles
- Ventilators
- Shoe covers
- Medical devices
- Medical devices' components and accessories

Two-third of MS indicated that they have strategic reserves. Which products do these cover?

- a. Personal protective equipment
- b. Ventilators
- c. Testing kits
- d. Medical equipment
- e. Medicines
- f. Other

II. Ramping up production

Most MS indicated that they are incentivising the domestic production of medical protective gear, test kits and active substances. Which incentives are MS using?

- a. Grants
- b. Loans
- c. Guarantees for purchasing up to 12 months
- d. Support to critical companies to maintain production lines

- e. Agreements with industry to switch production lines
- f. Matchmaking platforms
- g. Hackathons/Crowdfunding
- h. Provision of additional funding for R&I
- i. Public tenders/calls

Do you plan incentivising your domestic production of diagnostic test kits?

YES/NO

If so, by which means (Sli.do open question)

III. On obstacles and issues encountered when trying to ramp-up production:

A- Production input

Testing kits components

- no shortage
- Reagents:
- Buffer solutions
- Other kit components
- Tests kits
- Sample collection consumables
- PCR 'Machines'
- Consumables and accessories
- Other

Ventilators (free text box so they can specify the product)

- Filters
- Tube sets/Tubing
- Masks
- Accessories
- Components and parts
- others

Other medical devices, such as patient monitors or infusion pumps (specify which product – free text box so they can specify the product)

- * Components and parts
- * Accessories
- * others

- C- Other issues: which is the most pressing issue in your country?

Shortage of machinery used in production lines and which type

Intellectual property problems

Lack of capacity of Notified Bodies for certification of products: for which products?

Lack of capacity of testing laboratories for medical equipment: for which products? For which standards? Which specific tests?
