Dear all,

Enclosed please find the syndromic surveillance reports from Curaçao, St. Maarten & the BES islands for epiwk 17. Reports are lagging behind, because of the challenges posed by the COVID 19 response on all of the islands, for which my apologies.

We received reports from only 4 of the 7 sentinels reporting in St. Maarten.

Again the low incidences reported across the board for all syndromes being surveyed on all of our islands reflect the effect of the lockdowns that were in place.

I hope to be able to send the epi wk 18 reports as soon as possible.

Kind regards to all,

(10)(2e)
