Subject: Crushing coronavirus uncertainty: The big 'unlock' for our economies
Received: Fri 5/15/2020 6:33:33 AM

Hoi (10)(2e) (10)(2e) (10)(2e) (10)(2e)

Zoals jullie weten helpen we veel overheden, bedrijven en andere instituten over heel de wereld. We hebben ook een eigen epidemiologie en macro-economische denktank die werkt aan modellering.

Een aantal van hun inzichten zijn hierin samengevat, zie hieronder

<https://www.mckinsey.com/business-functions/strategy-and-corporate-finance/our-insights/crushing-coronavirus-uncertainty-the-big-unlock-for-our-economies>

"One of the most important implications is that the financial cost of a near-zero-virus package of public-health interventions—aimed at changing the economic outcome from the second to the first row of the scenario matrix—is dwarfed by the heavy economic price of ending up in the second row. After all, consider how many test kits \$5 trillion could buy. Accordingly, the financial cost of a near-zero-virus package could be irrelevant."

Groeten,
