Great job! So some selection bias but not so much?

Vriendelijke groeten,

Subject: selection bias scenarios

Hoi,

Among those with COVID-19 case defn *and* non-missing date of first symptom, the date of first symptom is:

253 More than 2 days following intake
 190 Within 2 days following intake date
 711 On or prior to intake date
 1154 Total

If no 'adjustment' for possible selection bias made, then the overall prop. of participants with COVID-19 syndrome is 19.7% (2981/15136)

If 'adjustment' made (by removing 711 participants with syndrome date prior to intake date), somewhat lower:
 15.7% (2270/14425)

See attached plot

Groeten (10)(2e)

Subject: FW: pc2_2019.rds

Als het goed is in attach de polygonen voor PC2 als we daar nog iets mee willen,

Gekregen van (10)(2e)

te importeren met `pc2_sf <- readRDS(file = "pc2_2019.rds")`

Vriendelijke groeten,

(10)(2e)
