Dear 5.1.2e [redacted] and 5.1.2e [redacted]

Regarding literature on mental health and risk communication, it seems that a lot is going on with the behavioral expertise group at the RIVM. Please see files attached and mails below. 5.1.2e [redacted] seems responsible for the literature part. It might be good to seek contact and discuss what they are doing, in order to prevent redundant work. It might however be good to secure a direct link from EPI / LCI to these groups, if they are making literature overviews as well.

Best,

5.1.2e [redacted]
