Subject: SV: Urgent request for comment on ECDC Threat Assessment Brief on COVID Reinfection
Received: Thur 9/17/2020 5:23:54 AM

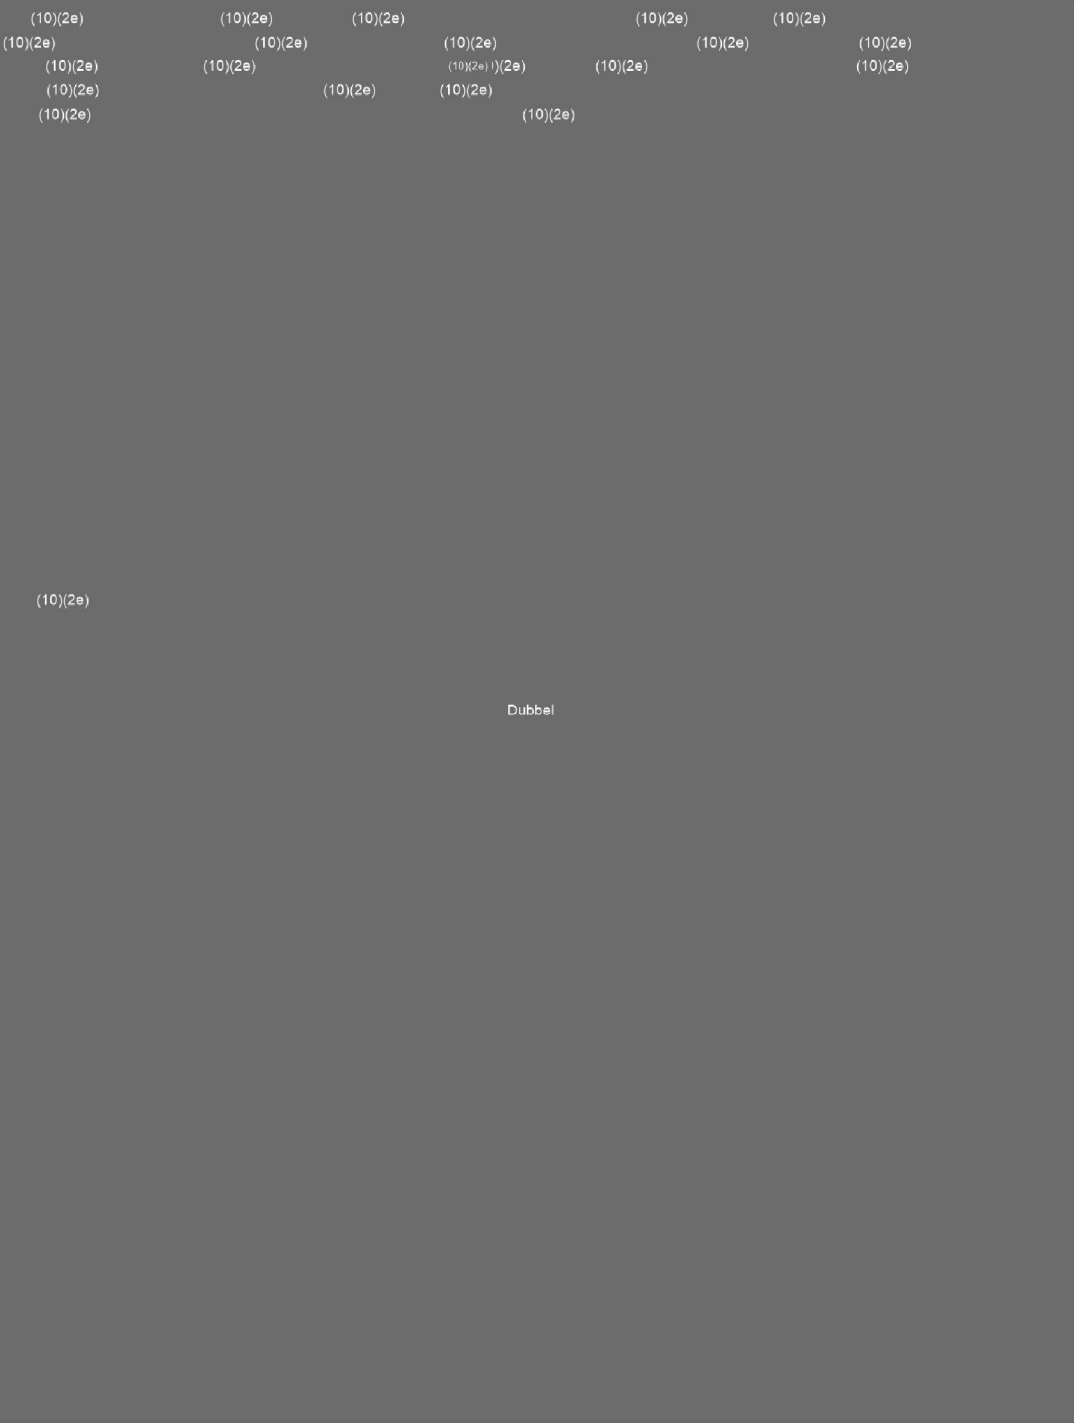

Thanks

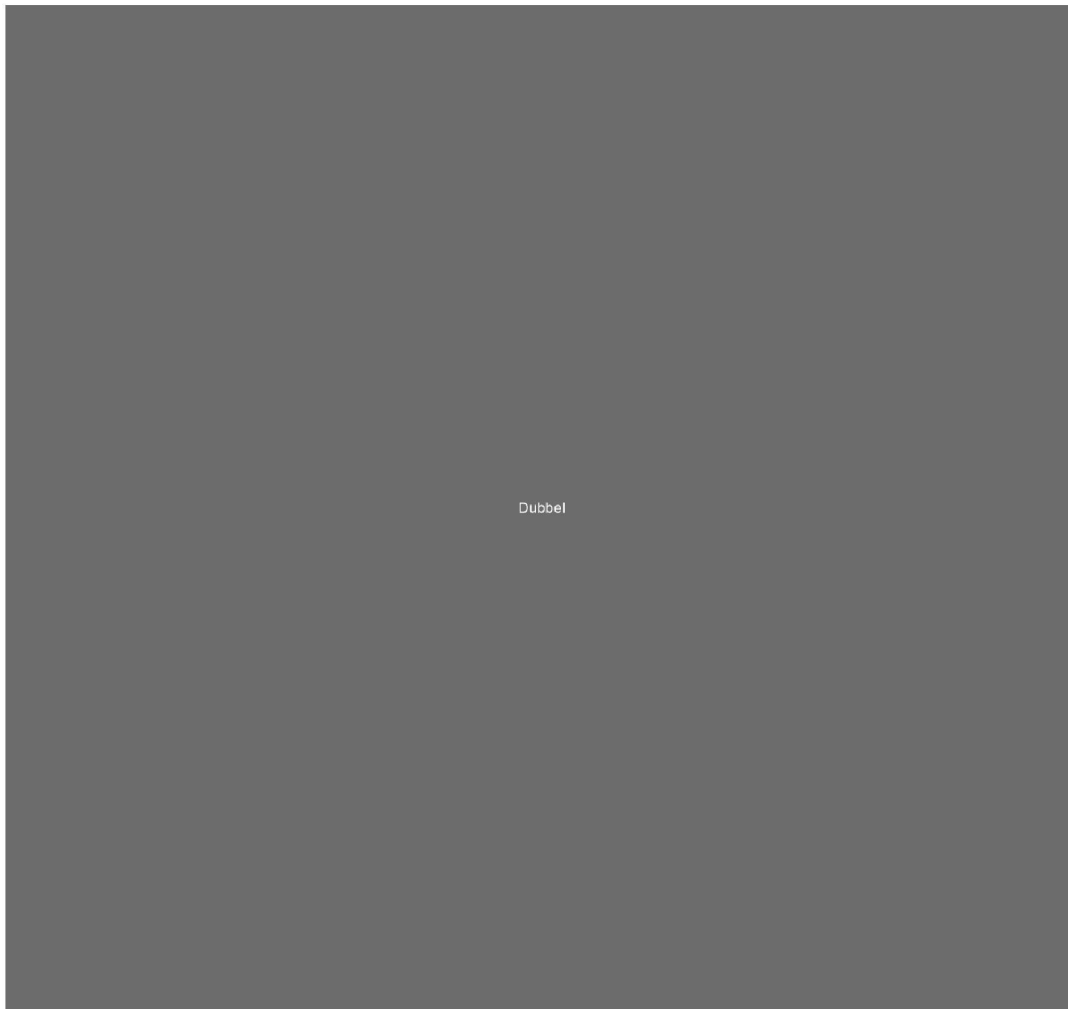

Important to follow and a good basis for doing that. It is important to realise that we will see reinfections but we need to understand the extent, when and whom is at risk and that needs to be communicated clearly. Our lab is a bit concerned about the issue of culture since that might have technical difficulties
