Dear (10)(2e)

I heard you in the JCVI meeting about serology.

I have attached our paper which is now under review which might be of interest to you. We have developed a very nice multiplexed assay measuring antibodies against S1, N and RBD simultaneously.

High spec (100%) and sens (94,5%); even higher than mentioned in the paper as we now use a HPLC purified S1 product.

Regards,

(10)(2e)
