Eerste indruk erg goed [redacted]

Ik ga 't straks meer precies lezen. Volgens mij slaat de vraag naar aanvulling ref's niet op onze sectie; maar als er toch nog wat ontbreekt hoor ik 't.

Groets

[redacted]

Hi Everyone

This is the version that I submitted to PLOS MED 10 minutes ago. We need complete references for some of the sections (no additional ones but the refs provided were incomplete), and I am thinking of some nice images, possibly from our application.

Happy to hear comments but for now, everyone, thanks a lot for your fast input!  
I think it came together quite nicely.

Subject: URGENT REQUEST, DEADLINE WEDNESDAY to contribute to an invited manuscript PLoS Medicine. Only need 400 word contributions BUT THIS WEEK

Hi

I have been asked to contribute to a special global health issue of PLOS Medicine. It has the following topics. After some back and forth with the guest editor, I have agreed to do this, to flag the VEO project. In the list below, [redacted] is part of [redacted] core science advisory team and is pushing for this issue for agenda setting. The timeline is killing, but below I propose to have short pieces (400) words for 8 topics so that is doable. I have prepared a googledoc, see link below.

Please let me know asap if you can contribute this, **I will need input by wednesday**. Pieces should be scientifically sound, forward looking, and exciting, and include some key references. I have indicated direction of content.

Also think of a key image

**Key Contact:** [redacted]

**Other key contacts:** Prof. [redacted], Prof. [redacted], Prof. [redacted]

**Organizations Involved:**

Center for Global Health Diplomacy, Delivery & Economics, UCSF UCSF Pandemic Initiative for Equity & Action (UPIEA)

Center for Dissemination and Implementation, Inst. for Pub. Health, Washington University

Centre for the AIDS Programme of Research in South Africa (CAPRISA)

**List of other proposed titles:**

- Post pandemic: How will COVID-19 transform global health?

- COVID-19 and implications for global health programs: Understanding
  - COVID-19 risks and vulnerabilities: the lethal force of syndemics
  - Assessing the economic impact of the excess mortality from HIV, TB, malaria COVID-19 in high burden countries
- Lessons learned from China's response to COVID-19
- The rising role of East Asia in defining the next chapter in Global Health
- COVID-19 – defining opportunities for creating a better tomorrow: Outlining an implementation science research agenda
- COVID-19 and advancing a UHC agenda
- Redefining the International Health Regulations – lessons that can be learned from the global response to COVID-19
- COVID-19 Vaccine: ensuring equitable, global distribution
- **Post-COVID-19; how being ready for the next pandemic will define the future of Global Health**
- Decolonizing Global Health in the Post-COVID era
