[Post COVID Paper The governance of data usability](#) [redacted] [.docx](#)

Hi [redacted]

These are my humble contributions to your great text!  
 I added some references that I believe to be of relevance and made some small suggestions of language.  
 Fell free to accept only what you agree with.  
 Call me if you want to discuss more, otherwise I am ok with sending it to [redacted]

Best,

[redacted]

**Subject:** Post COVID Paper  
**Importance:** High

Hi [redacted]

I never did this before on but I re-wrote the tekst with another focus.  
 I think this is more in line with the objectives of the VEO project. – about all kind of additional community data.  
 You must not hit me too hard!!  
 Now there is still an endeavoring enterprise: can you try and find here and there some references out of the research that has already been done for the VEO?  
 Of course for the one but last paragraph this will be the Gostin paper.  
 Don't kill me ..... I hope to hear your opinion and please change text as you think is necessary!

If we come to an agreement between us we can upload it to [redacted] in the course of tomorrow.

Best [redacted]
