Sorry I missed this. Via the web browser. But you are in.

Hi [5.1.2e]

I did contact IT to notify them that I was having issues with Citrix. Since yours works, can I ask, do you log into campus via the web browser or directly from the Citrix Workspace application?

Thanks,

[5.1.2e]

Hi [5.1.2e]
About citrix: I am now working from home in citrix without problems, but understand that [5.1.2e] and [5.1.2e] still have problems. If it is still not fixed, have you contacted people form the help desk? Usually they will tell you that they are working on it, and send you a text message if it is solved. Alternative is to wait and see...Sorry about this.
Best

Hi [5.1.2e]

Thanks for this. I was already beginning to think about situations where people only receive 1 dose (for whatever reason) and was wondering what efficacy would be like after 1 dose. You've read my mind. I'll take a look at these reports whilst waiting for IT to fix the issue with Citrix.

Best,

[5.1.2e]

Hi [5.1.2e]
Here are two reports, in the attached pdf and in the mail below of very high efficacies 14 days after one dose of vaccine for both the Pfizer and Moderna vaccines.
Of course the vaccination programme aims at completing the regular two dose schedule in time. But it might be good to explore scenario's where scarce vaccines are used to give more people a first dose and few people a second dose.

Ook belangrijk voor de GR in Nederland, lijkt mij.

Groeten,
[5.1.2e]
