Summary

Our Mission: Restoring Economic Continuity and the Return to Normal Life

Ecolog is a specialized logistics and life-support solutions provider actively operating in complex contingency and crisis situations across the world since 1998. Ecolog is a proven and reliable partner to be the no 1 choice. For us, failure has never been an option and our operations and services can be customized in accordance with your requirements, timelines and standards.

With Eco Care platform, we provide extended Covid-19 testing services in numerous other locations and have acquired significant experience in swab collection, sample management, and laboratory analysis.

In anticipation of the vaccine approval by the end of December, Ecolog has developed a **turnkey mass vaccination program in adherence with all standards and guidelines**. Our approach is to provide our clients with a **end-to-end comprehensive solution for installing and operating vaccination centers**.

We leverage our experience from setting up and operating Covid-19 testing stations throughout Europe and base our service performance on these proven operational concepts.

Ecolog's core competence are:

- **Project Management:** highly skilled management teams with proven track record;
- **Supply Chain Management:** centrally managed with strong local and regional presence allowing rapid mobilization of our projects;
- **Exceptional Quality Assurance**
- **Financial Strength:** Ecolog has a proven track record, working in support of governmental and international non-governmental organizations for years.

As a German company we are operating around the world and performing services under extreme circumstances, embodying a wide array of skills, qualifications and know-how, making Ecolog uniquely qualified as a full-fledged service provider for rapid, reliable emergency response for governments and private companies worldwide.

We Are Fighting COVID-19 in Europe, the UK and Worldwide

Ecolog under the EcoCare platform performs over 200,000 PCR COVID-19 screening and diagnostics Tests per day. We are among the few private companies performing COVID-19 tests at this scale and volume.

Ecolog delivers Luxembourg's nationwide COVID-19 testing program

- Performing up to **20,000 tests per day**
- Established, equipped, staffed, and operating **17 drive-through q-PCR testing stations** and one mobile laboratory - deployed in record time
- Infrastructure set-up: **40 trucks; 50 containers;** suppliers from 15+ countries
- Operated by **450+ qualified personnel**

Ecolog establishes 10 state-of-the-art containerized labs throughout UK

Ecolog is currently mobilizing the laboratories in a phased implementation schedule. The first laboratory was **established and operational within a record time of three weeks** despite challenges and constraints related to the availability and supply of equipment and materials. More than **500 personnel** operate the laboratories and perform approximately **100,000 COVID-19 tests per day in 10 different locations throughout UK.**

Brussels Airport Company has selected Ecolog to perform COVID-19 tests at the Brussels Airport

- Ecolog performs COVID-19 tests at the Brussels Airport for travelers returning back to Belgium as well as for people departing from the airport
- Contract foresees the set-up of a testing facility, enabling test analyses on site with a rapid turnaround time

State of Bavaria contracted Ecolog to perform COVID-19 tests at major airports, train stations and border crossings

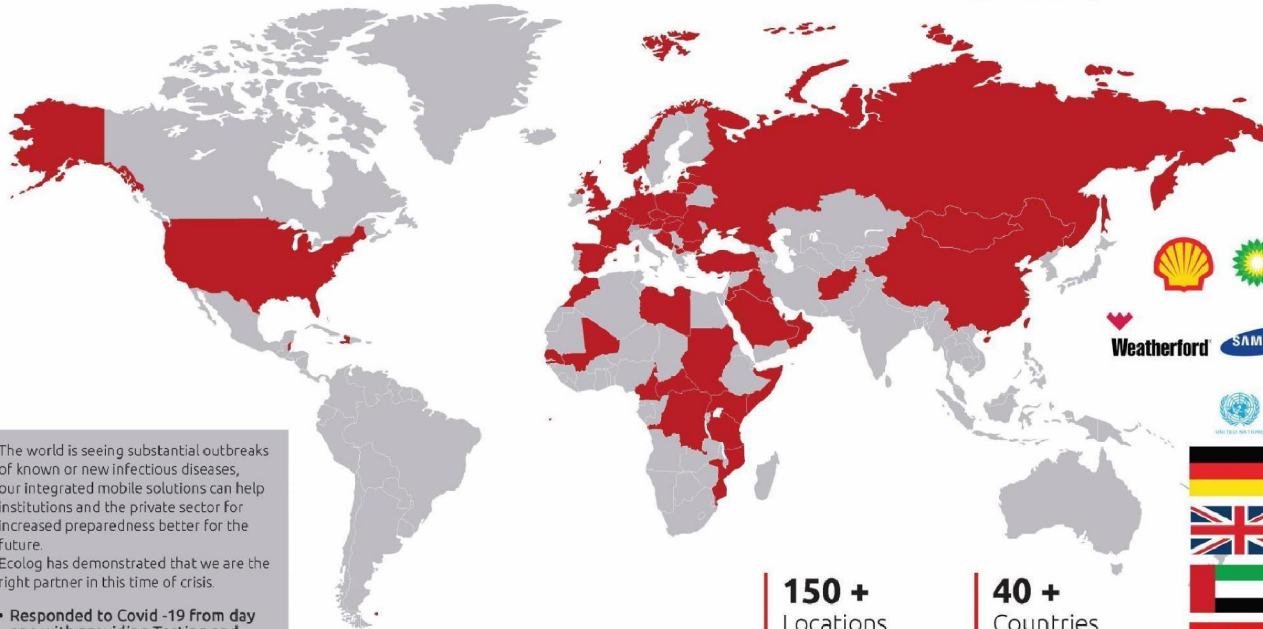

State Bavaria has trusted Ecolog will operations of Munich, Nuremberg and Memmingen airports performing over 10,000 tests per day. Due to the high influx in Bavarian borders, Ecolog installed two additional testing stations in central train stations in Munich and Nurnberg performing **a total of 18,000 tests a day.** Furthermore, we established testing stations in various cities in Bavaria, covering a population of more than 1 million people.

Our EcoCare clients include: Bayerische Landes Regierung, Luxembourg Institute of Health, UK Department of Health, the European Parliament, Brussels Airport, NATO, and Eindhoven Airport, among others.

Ecolog's Global Presence and Clients

The world is seeing substantial outbreaks of known or new infectious diseases, our integrated mobile solutions can help institutions and the private sector for increased preparedness better for the future. Ecolog has demonstrated that we are the right partner in this time of crisis.

We Are Your One-Stop-Shop – Vaccination Centre

We have the experienced, full-time employee leadership in place to effectively plan and mobilize the right resources and systems to achieve full operational readiness in a very quick turnaround, on or before December 15, 2020.

Our outline Eco-Care Vaccination Program, offers a unique and fully integrated large-scale vaccination solution supported by a robust digital platform with mobile, fully staffed and equipped stations.

Our high operational tempo, particularly in the delivery of Covid-19 related operations, means we have the people, systems, and infrastructure in place to execute mass vaccination projects successfully.

The following nine steps form the end-to-end process in our vaccination centers.

Eco-Care Digital Platform

With our EcoCare Digital Platform, Ecolog has the capability to capture, document, protect, report and archive vaccine distribution and inoculation data throughout the vaccination process.

Ecolog will implement a booking system through our digital platform to avoid waiting lines and close contact between individuals at the vaccination point, strictly within the requirements of social distancing.

The EcoCare Digital Platform will be used to track the daily number of vaccinations provided, with available inventory updated in real time, including client reporting in real time about vaccination program performance metrics and key data.

- Web-based platform in compliance with GDPR guidelines
- Digital platform can be integrated with existing systems
- Set up and implementation within days
- Automated, direct reporting capability
