Hi [redacted] 5.1.2e

So indeed, after giving it some more thought, it mostly is an issue of having three additional days to become infected with SARS cov2 before leaving.

Best

[redacted] 5.1.2e

Subject: Re: Risico van verlengen van geldigheid van PCR testen voor inkomende reizigers

Hi [redacted] 5.1.2e

Thanks. Indeed we had the same thought; that the increased risk is linked to the 2 additional days of potential exposure prior to travel.

SXM is currently testing incoming travellers at the airport who have an outdated or no PCR test result. [redacted] 5.1.2a
