Hoi 5.1.2e, deze stijging in resp disease lijkt vroeg in vergelijking met andere jaren. Als je met COVID zou willen verbinden dan suggereert dat een hogere incidentie dan dat je nu ziet in je meldingen.

Hoe dan ook: zorgelijk!

Groeten,

5.1.2e

**Subject:** weekly update syndromic surveillance in 5.1.2a & the 5.1.2a including epi wk 35

Dear all,

Enclosed please find the weekly update of the syndromic surveillance in 5.1.2a & 5.1.2a including epi wk 35.

5.1.2a shows a spike in incidence of respiratory disease as well as for undifferentiated fever.

There has been an increase of local transmission of COVID-19. Perhaps this is being reflected here. Our syndromic surveillance sentinel stations are also testing for COVID-19 and they have picked up several cases the past week. Local transmission of Covid is also reported in 5.1.2a as well as still in 5.1.2a

I hope to have informed you sufficiently,

Kind regards to all,

5.1.2e
