

you in support of The Netherlands government and that we continue to place the highest importance on this matter.

I contacted Mr 5.1.2e yesterday to confirm the elements of the proposed contract extension and supply of increased volumes of our SARS-CoV2 tests to The Netherlands. Your confirmation below, is a final essential part of a significant amount of work internally to secure additional test volumes. As I mentioned to Mr 5.1.2e during our call, this additional volume is being redirected from other geographical regions. In order to secure this volume, we had to ensure firm commitment from our market. You have provided this firm commitment which has been escalated internally today, by our 5.1.2a. Thank you again for your prompt reply.

I/we fully appreciate the urgency associated with this matter, however, there are some internal discussions/processes that must conclude before we can proceed. I had hoped this would be done this evening - this is the reason for the delay in my reply – for which I again apologise. It is also the reason that I send this note discretely to you and Mr 5.1.2e and have not included other cc's on your email below. I offer my reassurance that this matter is of the highest priority for us and has the attention of our highest levels of leadership in Hologic. Please can I ask for your understanding and patience for a few more days – hopefully less? I assure you, every effort is being made on behalf of The Netherlands government and people.

In parallel, I have requested our legal team to review and work up the amendments to the addendum so that we have that ready to send back to you. I have also informed our marketing team of the desire for a press release so that they are prepared to work with you on this promptly.

I am available if we need to discuss any details to the above, otherwise, please trust that I will be in contact again as soon as possible. Thank you again, most sincerely,

Kind regards

5.1.2e

Dear 5.1.2e

We heard via Mr 5.1.2e the great news regarding your allocations for The Netherlands. We at the Ministry of Health, Welfare & Sport, as well as especially our Minister of Health, and the Dutch Diagnostic Laboratories are very pleased with this.

We confirm:

- = in September we get 5.1.2b tests delivered
- = from October 2020 till June 2021 we get 5.1.2b tests per month delivered
- = we confirm these are the full corona tests, including tips, buffers, etc.
- = we also confirm that this will be a fixed volume commitment from The Netherlands
- = the current contract needs then (most likely) an addendum in which we increase the volume from 5.1.2b a month and let it last till June 2021 with a fixed commitment of The Netherlands

5.1.2e (and yourself) can work out the contract and logistical details with 5.1.2e and 5.1.2e

Once again, we VERY much appreciate your efforts and value the cooperation and relationship with Hologic a lot.

Kind regards,

5.1.2e

5.1.2e Ministry of Health, Welfare & Sport of The Netherlands.
