Dear 5.1.2e

I can deliver a brief presentation about the Dutch approach, between 15:00 and 16:00 h.
See the attached presentation.

Can you send me a video conference link?

Best regards,

Dr 5.1.2e

Subject: IIS / COVID-19 vaccines / Praeventis

Dear 5.1.2e

I hope you are well and healthy and going smoothly though another lockdown in the Netherlands!

Still working on IIS and quite some interests and discussions on ensuring that countries that have no registries, very basic systems or registries that do not include adults make improvements to their systems. There is pressure with upcoming COVID vaccines to be able to properly record vaccination and monitor vaccination uptake.

In the team at ECDC, we are having regular discussions/webinars with NITAGs throughout the EU (NITAG: National Technical Immunisation Advisory Groups)

We will hold a webinar next week (possibly Wednesday 11th afternoon) on options for how documentation of vaccination will be done, to support further vaccination of the individual with one or several doses, monitor vaccine uptake in the population and support post-authorisation studies to be conducted.

We would like to illustrate the discussions with examples of countries that have advanced IIS like yourselves in the Netherlands.

Would you be able to present on some technical aspects of the Dutch registries to record COVID-19 vaccination? But also on technical solutions and usability of linkage to other registries? Are they fit for barcode reading? it would be more of a general presentation on Praeventis and preparation for COVID vaccination. Say a 15 minutes presentation and time for discussion.

These webinars are usually 2 hours long. For the Netherlands, 5.1.2e and 5.1.2e are member of the ECDC NITAG network.

Please kindly tell me if you can participate. I would be good to have you present. 5.1.2a
