Onderwerp: Schip Polen - lees je even mee?

Dear colleagues,

we were informed that a Dutch person, who was working on board a vessel in Gdansk, Poland, tested positive for SARS-CoV-2 on 10 August (symptom onset on 10 August). He worked on the vessel on [redacted]

Name vessel: Amumdsen Spirit
 Place: Remontowa Shipyard, Gdansk, Poland

We were informed that several measures (testing and informing workers) were already taken by the shipyard and the company.

Are you aware of this situation and is it correct that more Dutch people were working on the ship? Should they be monitored? If yes, could you provide us with contact details of these persons?

Kind regards,
 on behalf of EWRS team the Netherlands,

[redacted]
