Subject: Children vs adults COVID-19 manuscript- ready for submission

Dear colleagues,

Thanks a lot for your contribution and input in the manuscript, which is now in its final version for submission to Science Translational Medicine. In order to proceed with submission **this Thursday**, could I please ask you to:

- Check that your affiliation is correct
- Indicate any Conflict of Interest to be included
- Check the contribution paragraph (see below) and acknowledgement section
- Mention funding if not already included

Thanks again for this true collaborative effort and your valuable contribution to this work,
 Best regards

Author contributions: [REDACTED] and [REDACTED] conceived the study and wrote the clinical protocol. [REDACTED] analyzed the majority of the clinical data, conducted and analyzed the cellular immune studies, and extracted and quantified RNA for RNA-seq analysis. [REDACTED] performed RNA-seq data analysis and generated related figures. [REDACTED] generated and analyzed the neutralization antibody data. [REDACTED] performed the Luminex assay for cytokine detection and data analysis, and the memory B cell assay together with [REDACTED] and [REDACTED] quantified the virus in all clinical samples. [REDACTED] and [REDACTED] performed isotype and subclass analyses [REDACTED] assays. [REDACTED] measured IgG antibodies to human coronaviruses by protein microarray. [REDACTED] and [REDACTED] recruited participants, organized and conducted study visits and collected clinical specimens [REDACTED] and [REDACTED] prepared figures and wrote the manuscript. All authors provided intellectual input and reviewed the manuscript.
