[proposal scenario analysis 20210119.docx](#)

Hi [REDACTED]

Here is the latest version with the report for the ministry of health. This approach has been a bit difficult because there is no clear question, and several of the more specific questions overlap with questions that are also asked through the Health Council and the Outbreak Management Team, which makes it very difficult to answer. So the focus is here on "providing insight in interactions between vaccination, control measures and testing" as this has the least overlap. I hope this is close to a final version.

If you see major errors or mistakes let me know.

Work for the ministry will then continue along the lines I sent earlier.

Best

[REDACTED]
