**Subject:** FW: slide consortia RG vaccinatie

Hi 5.1.2e

Weet jij heel toevallig 1 naam en 1 ziekenhuis per consortium uit onderstaande slide?

#### COVID-19 Vaccinatie van risicogroepen: trial consortia\*

Naam	Risicogroep
Target2Be	Patiënten met auto-immuunziekten en niet-aangeboren immuundeficiëncies
VOICE	Oncologie patiënten
RECOVAC	Niertransplantatie- en terminaal nierfaalen patiënten
COVALENT	Longtransplantatie patiënten
VACOPID	Patiënten met aangeboren / primaire immuundeficiëncies
PRIDE	Mensen met Syndroom van Down

\* voor zover bekend

Dan zet ik die er snel nog even bij.  
 Alvast dankjewel!

Met vriendelijke groet,

5.1.2e

Hoi,

Zoals beloofd in # een (simpele) slide met trial consortia mbt risicogroepen vaccinatie voor zover nu bij mij bekend.  
5.1.2e mocht jij er meer weten, wil je dan ajb aanvullen?

Dit is ter backup, mocht er morgenavond om gevraagd worden.

Gezien de actualiteit van de 1 dosis-discussie heb ik nu geen overzicht gemaakt van 1D-effectiviteit.

Met vriendelijke groet,

5.1.2e

**Subject:** FW: Statement on first dose prioritisation JCVI en berekeningen

Hi,

Wie weet weten jullie dit al en wellicht ten overvloede. Ik kreeg deze van 5.1.2e nav onze discussie hierover. ( zie link in mail 5.1.2e 2 januari)

NB: Je ziet de hoge bescherming ook al in de figuur van het artikel in de NEJM over het Pfizer vaccin en dat de 50% na 1 vaccinatie erg artificieel is. Het is duidelijk dat na die eerste weken je op 80-90% bescherming komt, alleen op dag 19 is het 50%. UK wil op den duur wel voor 2 vaccinaties, maar later na een langer interval. Idem Quebec.

**Subject:** FW: Statement on first dose prioritisation

Hoi 5.1.2e

UK gaat ook 1 dose geven en tweede dose max 12 weken later.

Dan kunnen we nu meer personen met 1 dose gevaccineerd worden.

De berekeningen van VE zijn nu anders omdat de cases in de eerste week na vaccinatie eruit zijn gehaald.

Dan is VE nagenoeg gelijk aan 2 doses.

Ik neem aan dat deze info bij onze collega's al bekend is, zo niet, wil jij doorsturen?

**Subject:** Re: Statement on first dose prioritisation

Thanks [REDACTED] - I've spent most of the day trying to communicate these two issues and have had many emails from patients and colleagues. I've been forwarding our statement. I'm a RCGP member and haven't received an email the College them so we may need to make sure this has happened. I have a meeting with them tomorrow afternoon about a YouTube informative panel discussion aimed at RCGP members.

The BMA have been especially unhelpful and [REDACTED] followed me on LBC and was still pretty negative, despite some understanding. Another issue that is coming up is supply and a misconception that our decision was based on lack of supply and not VE. And possibly our statement about this isn't completely clear, especially as the PM said (cleared by JVT) that there would be

tens of millions of doses by March.

The other issue that is coming up is mixed vaccine schedules which is relatively easy to deal with, and Mary's press release helps.

On 2 Jan 2021, at 20:11, 5.1.2e (Respiratory Medicine) <5.1.2e@nuh.nhs.uk> wrote:

Dear JCVI members,

As you will know, since Wednesday, there has been quite a storm relating to our decision to allow the second dose of the Pfizer vaccine to be given up to 12 weeks after the first dose.

This has been energized by 2 factors:

1. The press release by Pfizer re-stating their position, and re-issuing the figure of 52% VE after the first dose
2. The unhappiness, mainly from primary care, regarding the instruction they received to re-assign appointments already made for the second vaccine dose.

On Thursday, Mary and I were at a meeting with the Presidents of the Royal Colleges and the BMA Council Chair, chaired by Stephen Powis. My sense was that everyone at the meeting went away with much greater understanding and agreement of the rationale behind our decision.

On New Year's day, the RCGP emailed a letter to all RCGP members to aid with information dissemination. The email included the Short Statement from JCVI which was released on Thursday evening.

The CMO's CAS Alert on Thursday evening also contains the JCVI Short Statement, and the COVID19 GB chapter. So, it is a good link to share: <https://www.cas.mhra.gov.uk/ViewandAcknowledgment/ViewAlert.aspx?AlertID=103132>

To further aid visibility, we are seeking to have the Short Statement published alongside the 30 Dec JCVI Statement on the DHSC website.

Below are news articles regarding US and Canadian responses to the UK position. Looks like both points of view being debated.

<https://www.businessinsider.com/expert-reaction-uk-untested-vaccination-strategy-single-dose-pfizer-2020-12?r=US&IR=T>

<https://www.theglobeandmail.com/canada/article-new-data-favour-administering-covid-19-vaccines-as-fast-as-possible/>

It is understandable that the US policy team are defending their current position on the dose interval for the Pfizer vaccine. The UK's move will have put pressure on them. **We have had the advantage of seeing the latest analyses from the AZ trials which provide some evidence supporting a good first dose effect lasting to 12 weeks.** There is no strong reason to believe that the Pfizer vaccine would provide less protective immunity.

All your efforts in communicating the rationale behind the JCVI advice is much appreciated. Please continue to share the Short Statement as appropriate. Whilst clinical trials of a 2-dose extended interval schedule are unlikely in the near future, we will obtain non-randomised data from post-implementation surveillance of vaccine effectiveness (and the UK is uniquely placed to gather such data).

Best wishes,

5.1.2e

**Subject:** Statement on first dose prioritisation

Dear JCVI Members

We have had to quickly put together a short statement on JCVI considerations on the interval between doses, given a substantial amount of interest in this overnight with some criticism from some quarters.

I attach the statement, which was agreed with the Chair, and is now available on the JCVI website alongside meeting minutes. [Minutes](#) | [Powered by Box](#)

Kind regards  
 Andy
