

WAY FORWARD FOR CROSS-BORDER VERIFIABLE COVID-19 VACCINATION CERTIFICATES

2021-01-14

Background

Registering data on vaccination is important both at **individual and population levels**

It can be used for vaccination monitoring and helps citizens to prove their inoculation status

The proof of vaccination is useful for supporting **vaccination delivery and reopening strategies**

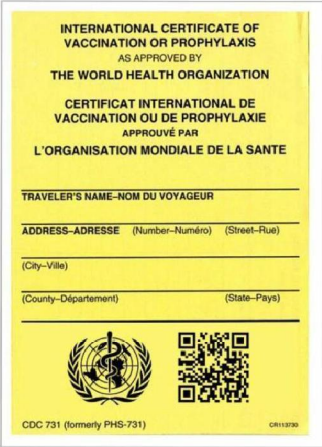

Proposed solution – digitized vaccination certificate, “Smart vaccination certificate”

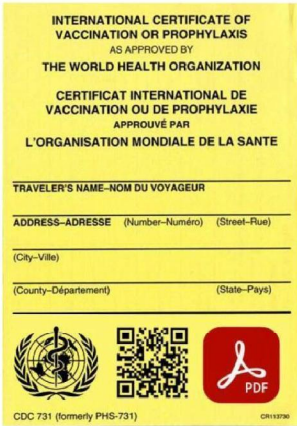

Regardless of what type of point of service solution member states choose to adopt (paper or digital), depending on country context, the solutions should be interoperable and be inclusive by design.

Illustrative examples:

Enhanced paper-based certificate

Enhanced PDF-based certificate

Smart phone application

Linked to smart chip in a card and/or passport
