Programma Covid-19-vaccinatie

Overleg	Brainstormsessie Monitoring (WP7)
Vergaderdatum	10 februari 2021
Vergaderplaats	Webex Teams vergaderruimte
Deelnemers	5.1.2e, 5.1.2e, 5.1.2e, 5.1.2e, 5.1.2e, 5.1.2e, 5.1.2e, 5.1.2e, 5.1.2e, 5.1.2e, 5.1.2e, 5.1.2e, 5.1.2e, 5.1.2e
Afwezig	5.1.2e, 5.1.2e, 5.1.2e, 5.1.2e
Notulen	5.1.2e

King Willem-Alexander visited RIVM due to the Programme Covid-19 vaccination on 09-02-2021 (secret and thus a surprise).

Collecting numbers

- Still not automated.
- Checking figures of today → 5.1.2e (the vaccines distributed).
- New challenge to collect numbers vaccinated, because of the different vaccines used.
- Check the with colleagues involved in the implementation part.
5.1.2e will check who are contact persons.
- GGD: for the time being data will be provided by email.
More or less 340.000 by now.
- Through ECDC-meeting, surrounding countries report difficulties with the gathering of numbers gathering.
- Difficulties with downloading numbers in Tessy.
No daily numbers available for all the groups.
- Expectation of this automated process; 5.1.2e spoke 5.1.2e, who is preparing the script and does the programming.
For monitoring, we rely on the numbers we receive.
A daily update of the week totals is simplest solution.

Overview

An overview of the different sources and groups is crucial will give clear view of where to take action and it lists the different institutions that vaccinate 5.1.2e
An update is performed every week.
To be used for RIVM internally and maybe for the overall dashboard.
Acute Care and the 12 first institutions will complete vaccinations in a

couple of weeks. But GGD will keep vaccinating and GP's start 15/02.
 Contact 5.1.2e f GGD; to check what will work as to providing numbers.
 5.1.2e will be working with GGD to update the enormous
 Excel spreadsheet. Share 5.1.2e excel sheet with the group → 5.1.2e

Ons kenmerk

Team expansion

We have asked to recruit two people for the vaccination numbers.
 And we probably need people in RES-team and RVP-team.

Vaccine Coverage

Denominators and numerators of home dwelling elderly are mixed up with elderly living in care homes.

5.1.2e made an excel sheet "Overview vaccination data per age", to be discussed with 5.1.2e

Check the statline to get numbers of care homes and handicapped facilities. This is a lower number than the work package number of all long term care facilities.

The denominator is rough → as of 1-6-2020, the numbers of handicapped facilities will not change the denominator enormously.

Coverage of 90+ age is 97%.

BES

5.1.2e discussed for BES to give the options to be centrally registered in RES and not in CIMS. BES authorities are a bit hesitant, but we try to convince them. Hesitancy is that people will not want to be vaccinated when registered.

BES have ID-numbers and an Island code instead of BSN and postal code. Legally there is no reason why BES should not be registered in CIMS.

CAS

For CAS we will receive anonymous data as of 22-02-2021.

5.1.2e reported RIVM will probably only have aggregated data; 1st and 2nd dose will not be on the same line.

The weekly update will provide separate BES and CAS paragraphs for the press. Advising to make separate documents because we need approval of the separate islands.

5.1.2e contacts the contact person how to collect the data and will discuss separate reporting for BES and CAS.

BES and CAS data does not have to be published on the national dashboard.

Vaccine efficacy

In Osiris: the most recent data/numbers of vaccinated health care workers in hospital are available. 5.1.2e

Did we ask about the profession with the 1st vaccination?

Discuss with R-team, to make the numbers available daily. Do we need this info to be able to answer questions? We can already estimate.

Acute care is not specified.

The numbers of vaccinated long care workers (care homes) are only specified into long care and 24-hours care.

Wrong way of transportation

Data of vaccines that might not work because of wrong transportation is very important. We need to be able to follow this matter very strictly to see what effect wrong transportation has on vaccines and efficacy.

Ons kenmerk

Contest has started

Short update meetings are planned.
180 people filled in questionnaires as from 08-02-2021.
We will discuss with communication on promotion of the study.

South African Variety

Health Council assumes that AstraZeneca will work less well.
Health Council meeting coming Friday to discuss all info from literature.
5.1.2e is working on a report as input for this meeting.
The strategy to use AstraZeneca will be discussed.

Incident issues 5.1.2e

15 cases of epileptic seizures after vaccination (of which 1 death, a person with underlying clinical picture). Most (at least 11) had epilepsy in history. Media attention for fatal cases after vaccination, reported by Lareb. Up till now, 26 deaths are reported.
Remarkably few reports of adverse events in the elderly were received by Lareb.
CGB reports they receive info from other countries. NL is doing okay, only anaphylactic reactions seems to be a little higher compared to f.i. the USA. No anaphylactic reactions this week up to now.

Any other business: no particularities.

Acties:

Date	Nr.	Onderwerp	Wie	Deadline	Datum
23/12	1	Registration data & study newly collected data; first draft made	5.1.2e	Ongoing	10 februari 2021
23/12	2	Overview document monitoring & evaluation (draft by 5.1.2e) - check document - check comments - save document with your initials - and send link on	All	End February 2021	Ons kenmerk
6/1	2	The surveillance team asked if we can provide their planning with vaccination data when available. 5.1.2h	All	a.s.a.p.	
13/1	1	Discuss with the RIVM-Communication department on how and when to publish data on the website.		a.s.a.p.	
13/1	2	HPzone data: vaccinated and not-vaccinated, surveillance data. Cases in vaccinated persons. Actively ask for data.		Ongoing	
20/1	2	Moment of delivery of documents on modulating Check with 5.1.2e			
20/1	2	Vaccine Efficacy: Does confounding influence estimates of VE?			
27/1	1	Tools developed in advance, to use for BIAS in test-negative design. Contact 5.1.2e cc 5.1.2e			
27/1	2	ECDC meeting 29-01-2021 on hospitalized test-negative people. Attend meeting and give feedback afterwards.		10/2
