**Onderwerp:** RE: Oxford coronavirus vaccine shows sustained protection of 76% during the 3-month interval until the second dose

Nee,

GR zegt twaalfde week. JCVI bevestigt dat langer beter is.

Dus dat maar aanhouden? Langer is beter...dus liever vlak erna dan vlak ervoor

Mooi, goed om te weten.

En wat wordt het streefinterval in NL? handig om te weten voor de richtlijn.

Volgens de NOS 10-12 weken. Hebben we ook een interne bron?

Hartelijke groet,

[5.1.2e]
