[ModellingresultsCOVID19vaccination draftversion 03 20210204 5.1.2e.docx](#)

I agree with 5.1.2e it's a very nice document. I've also made a few edits and comments (see attached). My main comment is whether we want to display some plots for the deferral dose question. I think it would help to have some plots to visualise the impacts of protecting more people with one dose rather than fewer people with one dose. I can create some plots similar to the ones I did for the analysis of which vaccine to give to 60-64 year olds. We could even just include one plot in which we have the incidence displayed under the two scenarios for easy comparison.

Best,
5.1.2e

Very nice!

Some small comments.

Best wishes,
5.1.2e

Thanks!

I have now compiled the text from you both into a new report, the newly written parts are page 2 and page 27-31. All comments are welcome

Best

Hi 5.1.2e

Here are my comments/edits. I added a paragraph at the end about the pre-preprint I sent you this morning. Feel free to cut it out if it's not appropriate in this report.

Best,
5.1.2e

Hi [redacted] 5.1.2e

Apologies for the late reply to this. I'm adding my comments now. I will send it shortly. I hope it's not too late.

Best,

[redacted] 5.1.2e

Subject: part of the report for ministry and health council on deferral second dose

Hi [redacted] 5.1.2e

Here is a part that I wrote on the deferral of the second dose. Feel free to correct, add, remove bits of the text. All suggestions more than welcome.

I hope to send it off to [redacted] 5.1.2e by tomorrow around noon, together with a section written by [redacted] 5.1.2e

Best

[redacted] 5.1.2e
