

Corona gear – let's see if we can help each other out

Dear medical partner,

We are making history as we speak. The world is changing and this is a good time to see if the international medical community can get together to see if we can help the world heal quicker.

I'm sending you this email because we have done business in the past, or because I got your email address from a very good mutual friend.

There is shortage all over the world, maybe we have products that you don't have and the other way around. We want to keep the business fair. It's alright to make money. But the prices should be fair. I would love to help out our local government as do you, I believe.

So let me start with what we have got. We have 10.000 bottles of 66% alcohol disinfection fluid. They will be at our company on the 24/25 of march. We have about 40.000 liters of Isopropanol 91% alcohol. Easy kit disposable blanket kits, about 4.000 of them, coming in this week. And different possibilities to get gloves. If you have need for these products, or if you have better channels, let me know please.

Then what we need. FFP2 mask, we can't seem to get our hands on FFP2 mask and other disposable products like medical overalls and gowns. If you can help us out please let me know. If you need anything let us know, maybe we can help.

Let's fix this problem together to keep our hospital staff, army, police etc safe in this ordinary time.

Thank you in advance, bless you and stay safe,
