Subject: Clinical relevance of your Supply

Dear 5.1.2e

We understood from your sales team that due to the COVID-19 outbreak all orders are on hold.

To coordinate the distribution of available products, we understand that 5.1.1c is required to check with both Outbreak Taskforce and its customers regarding clinical relevance before committing to delivery.

The products 5.1.1c supplies to Aspen Oss B.V. are as follows:

Vendor Material number	material text - standardized
5.1.1c	5.1.1c

Aspen Oss has extensive expertise and over 90 years of experience in the large scale extraction and purification of biochemical products, in particular heparin sodium and danaparoid sodium, from natural sources.

These biochemical products are approved as Active Pharmaceutical Ingredients (API's) for the following Pharmaceutical products in, amongst others, the European Union and North America:

- Fraxiparine 5.1.1c
- Fraxodi 5.1.1c
- Orgaran 5.1.1c
- Lovenox 5.1.1c

These pharmaceutical products are anticoagulants belonging to a class of drugs called low molecular weight heparins (LMWHs). These pharmaceutical products are used during orthopedic surgery to prevent thromboembolic disorders and as treatment for deep vein thrombosis.

Aspen Oss B.V. is an essential supplier to the above-mentioned pharmaceutical companies whose continuous supply is critical for the continuity of production of the medicines and lifesaving drugs, as mentioned above. Interruption of this supply will affect production of those products critical for public health.

Please note that Aspen Oss B.V. is in the process of preparing a forecast of the demand of the aforementioned [5.1.1c] products to safeguard the supply of the mentioned pharmaceutical products to the market and to prevent demanding unnecessary stock from [5.1.1c] during this COVID-19 crisis. [5.1.1c] will be informed on our forecast by separate e-mail.

Our Supply Chain Management Team, together with our Quality Control Laboratory, is lined up for detail discussion, if required.

For any further information or clarification, you can contact [5.1.2e] [5.1.2e] [@nl.aspenpharma.com](mailto:[5.1.2e]@nl.aspenpharma.com) or + [5.1.2e].

Sincerely yours,

[5.1.2e]
