COVID-19 Response
Tracker: Open source intelligence collection

Tadaweb is the world's leading Open Source Intelligence collection platform for Government. We focus on giving analysts what they need, when they need it, in a legal and policy compliant manner.

In response to the COVID-19 crisis, we are offering a significant part of our toolset and our team's time at **no cost** during this crisis. We have built a series of specific COVID-19 tools to accelerate collection and support our partner Governments.

Tadaweb's COVID-19 Response platform is accessible through a dedicated site online.

For further details please contact us on:
5.1.2e @tadaweb.com

Our COVID-19 response tracker currently focuses on:

Monitoring disinformation linked to COVID-19
Track COVID-19 related disinformation as it moves across multiple social medial platforms.

Monitoring civil disorder overseas
Spot general civil disorder in other countries as a result of COVID-19.

Finding your at risk population overseas
For Consular Services to help identify nationals in trouble overseas.

Diplomatic reactions
See all official statements around a country's COVID-19 actions and their reactions to your own domestic policy.

Supply chain disruption
Early identification of disruption to medical supplies, food imports and oil and gas flows.

Economic shocks
Track macro-economic issues, central bank statements, interest rates, IMF actions.

Track cyber threats
Find actors that are taking advantage of the situation.
