Dear [REDACTED]

I am hoping we can discuss the idea of you presenting at the Annual Conference on Immunology and Virology (ACIV), which is held in Athens next year on Saturday January 30, 2021. As one of the members of the organizing committee I am working on filling a few remaining speaker slots.

These are some of the presentations which will be part of the conference. In addition to the plenary session there are nine sessions planned which focus on more narrow topics.

- Keynote presentation - Regulatory T cells in cancer: What's next?
- Tumor Immunology session - T-cell trafficking plays an essential role in tumor immunity
- COVID-19 session - The effect of travel restrictions on the spread of COVID-19
- COVID-19 session - Pathological findings of COVID-19 associated with acute respiratory distress syndrome
- Immunotherapy session - Dendritic cells in cancer immunology and immunotherapy

More information is available on the conference website at <https://conferences.aoamj.org/immunology>

May I send you a copy of the preliminary program?

Sincerely,

[REDACTED]
