Dear 5.1.2e

a million thanks! This is very helpful. Just to make sure: so as to know the total number of deaths, these number correspond to the update Epidemiologische situatie COVID-19 in Nederland Rijksinstituut voor Volksgezondheid en Milieu - RIVM 04-04-2020, 10:00, correct?

Kind regards

5.1.2e

Dear Professor [REDACTED] 5.1.2e

As of 10:00 today, we had 84 patients under 65 who died. For 17 of them we do not (yet) have information on whether they had known underlying diseases/conditions. For the remaining 67, 5 did not have any underlying diseases/conditions.

Best regards,

[REDACTED] 5.1.2e

Kind regards,

Subject: Information on age and underlying diseases for COVID-19 in your report

Dear RIVM team,

I am performing a meta-analysis of data from multiple countries on people who die with SARS-CoV-2 and who are younger than 65 and do not have any underlying diseases/conditions. In the Epidemiologische situatie COVID-19 in Nederland Rijksinstituut voor Volksgezondheid en Milieu - RIVM 01-04-2020, 10:00 report, there are 60 patients who died younger than 65 (table 3). Can you please tell me how many of these 60 patients did not have any of the diseases/conditions of Table 5b (Zwangerschap, Cardio-vasc. aando. en hypertensie, Diabetes, Leveraandoening, Chron. (neuro)musculaire aando., Immundeficiëntie, Nieraandoening, Chron. longaandoening, Maligniteit).

I thank you in advance

Kind regards
