

The businesses will be picked with regard to the price they are able to offer. Germany, represented by the Federal Ministry of Health (who is the contract-partner) will pick at least 2 and max. 100 businesses per item (item 1: FFP2-masks, item 2: OP-masks and item 3: gowns) to reach the **maximum purchase quantity** which is 5-10 Mio FFP2-masks/week, 20-40 Mio. OP-masks/week and 1 Mio. gowns/week. Contracts that have been made within this procurement procedure are to last until the end of 2021.

Here is a general text about this on the website of the BMG:

<https://www.bundesgesundheitsministerium.de/ministerium/meldungen/2020/herstellung-schutztausruestung.html>

The detailed conditions:

https://www.bundesgesundheitsministerium.de/fileadmin/Dateien/3_Downloads/C/Coronavirus/Unterlagen_Schutztausruestung/01_AZA_mit_Bewerbungsbedingungen-Verhandlungsverfahren_Schutztausruestung-200402.pdf

All in German unfortunately, so let me know if you need any support in reading. Also, let me know if more detailed information and a direct contact is needed. In ordinary times Thomas Müller, head of Abteilung 1, who was also present in the pharma-section in January is responsible for medicinal products (not the subsection of Lars Nickel though). But Ingo Behnel, who is the head of the Zentralabteilung and also the section who normally does procurement procedures, might be in charge here. Get back to me if you want me to check this.

Best,
