Subject: COVID-19 medical devices backup from Joint Team
Received: Fri 4/17/2020 6:52:05 AM

How are you? Hope this find you well!

Since the COVID-19 spread all over the world, and we were asked by many of our oversea partners to support some Medical Devies.

We now are managing about 20+ medical devices factories to supply millions of masks every week. Joint Lighting team are doing this just for using our team (in this not busy time) to sell masks to go against Virus. We will keep average 5.1.1c profit from your orders, all profit (Beside Joint's operation cost) will be returned to the same value of the masks and give back to your country, so kindly share the contact info of your government officials who can represent your government to take the return-profit-masks back to your country for helping the people who need Masks but could not get it somehow.

Again, Joint doing this with mission to support and help, but not for the profit! We are kind of success in North America market and ranked as Top 4 for area light and street light players, sports light. Now we are expanding our market to South America and EU for more successes with more service like customized design, helping building up local workshop, etc.

Epidemic Prevention Non-Profit Service From Joint Team 2020

Infrared Thermometer
