age missing					5	
Proportion of males among the new confirmed case deaths – calculated as the number of new confirmed case deaths in males, divided by the total new confirmed case deaths for which sex is known	n/a	n/a	n/a	n/a	UNK	n/a

* Case registers for Aruba and Sint Maarten have not been updated, therefore a lot of information is missing. We did receive daily updates on current hospital admissions, but these do not provide definitive information on the total cumulative hospital admissions as discharges have not always been reported.

** two deaths retrospectively reported; one from July 30th and one from August 26th

*** including cases with missing age from last week
