Thanks 5.1.2e [redacted] for confirming in writing on behalf of the Government.

We can now finalize details and signing of the deal.

Thanks 5.1.2e [redacted] for your remark on the consumables of the extra 5.1.1c [redacted] for October.
 So we focus for October on 5.1.1c [redacted] corona tests, for 5.1.1c [redacted] the consumables are guaranteed;
 for the extra 5.1.1c [redacted] you will also try delivering all consumables (hopefully that works... * ...), but that is not committed (yet).

Lets go like this: great cooperation between Hologic and Dutch Government.
 And to you personally 5.1.2e [redacted]: thanks a lot for all your efforts

5.1.2e 5.1.2e

Dear 5.1.2e,

Thank you so very much for your confirmatory email. I am very pleased to confirm all of the details as noted below.

The one point to add for clarity is regarding the 5.1.1d tests in October that are denoted as 'without consumables'. Please know, we will absolutely do everything that we can to supply the majority of the consumables for this volume. However, as I have advised 5.1.2e, there are a couple of key consumables that are under extreme pressure globally. The situation is very fluid and we are working on remediation of these constraints. We will keep you fully updated as the situation evolves. Best case scenario, we are able to source all the consumables needed to support the 5.1.1c volume – however we need to be very open and honest about the worst case up front. Thank you for understanding this point.

I have advised our legal team of the details and have asked them to mark up the addendum for return post haste. We now look forward to working on the details for execution.

I extend, on behalf of the 5.1.2e our thanks to you and to The Netherlands Government for your faith in Hologic and for your support. I would like to specifically thank 5.1.2e for his efforts and contribution to this successful outcome for The Netherlands.

On behalf of the entire Hologic team, we are very proud to be in a position to support the Government of The Netherlands at this critical time.

Kind regards

5.1.2e
