Thanks [redacted]  
 Indeed it is a big problem.

This morning I was vaccinating the University personnel with AZ and after we vaccinated about 400 people we were called by the Regional Health Office who told us to stop using that batch because a judge in another Region declared that to stop to use it ... No evidence of anything. But we had to send back 650 who were expected to be vaccinated today !

Not good at all.  
 Best
