Onderwerp: [PRESS RELEASE] Commission supports Member States in tackling coronavirus hotspots with offer of four million additional doses of BioNTech/Pfizer vaccine to be delivered this month

Dear Members of the Steering Board

Please find below a press release on what the Commission managed to obtain from BioNTech-Pfizer, to accelerate 4 million doses from the first contract of 200 million doses.

We will shortly receive more detail and will keep you informed on what it will translate per Member State.

Best regards

Commission supports Member States in tackling coronavirus hotspots with offer of four million additional doses of BioNTech-Pfizer vaccine to be delivered this month

The European Commission has reached an agreement with BioNTech-Pfizer for the supply of four million more doses of COVID-19 vaccines for Member States in the next two weeks in order to tackle coronavirus hotspots and to facilitate free border movement.

The President of the Commission, Ursula **von der Leyen**, said: "*To tackle aggressive variants of the virus and to improve the situation in hotspots, quick and decisive action is necessary. I'm happy to announce today an agreement with BioNTech-Pfizer, who will offer to Member States to make available a total of four million doses of vaccines before the end of March which will be supplied in addition to the planned dose deliveries. This will help Member States in their efforts to keep the spread of new variants under control. Through their targeted use where they are most needed, in particular in border regions, these doses will also help ensure or restore free movement of goods and people. These are key for the functioning of health systems and the Single Market.*"
