

Subject: [Spam] Coronavirus Vaccination Passport solution for the UK

Received: Tue 3/16/2021 8:01:38 AM

EU commision white paper original.pdf

Dear Sir/ Madame,

### Re: Coronavirus Vaccination Passports for UK Citizens

### Background

We have developed a patent pending blockchain solution that securely stores, retrieves, and verifies documents which cannot be forged or tampered with. This provides complete control and authentication to a sourcing body like NHS UK, for example. This solution is currently beginning to be used with great success to securely store and retrieve University certificates and private property registrations - please check our website www.reganto.com for further information.

Furthermore, we are delighted to say that we have met the EU whitepaper requirements as detailed in the attached document for reference titled "Sharing Pandemic Vaccination Certificates through

Blockchain" written by the European Commission, Joint Research Centre in Ispra 21027, Italy, and published on January 13, 2021.

## **Application Demonstration**

We have built the prototype showcasing this now which can be demonstrated to show how this will work to relevant decision makers providing confidence in the solution. We believe we can create a game changer in the fight against the pandemic on a large scale very quickly that can be used for all future types of boosters/vaccines administered to all UK citizens. Our solution can be implemented within 2 weeks at chosen site to show this working as proof which can then be replicated very quickly and rolled out across the UK capturing all data from December 2020 to the present point in time.

I believe by creating such a transparent immutable "truth of data" solution that allows checks to be carried out instantaneously using a mobile app at the borders, verifying, and authenticating, that citizens have been correctly vaccinated by authorising Health Organisations of fellow countries. This will be of immediate benefit e.g. at the border control points for entry or leaving the UK opening all forms of travel to begin to get this industry back up and running again.

# About Reganto, the App.

Reganto is part of the Wealden Group incorporated in 1983 in the UK. Wealden has been providing industry leading solutions to clients as diverse as government bodies, international groups, schools and universities, commercial businesses, and large multi-national organizations. We have served well over 10,000 blue chip clients with over 100,000+ system users in our time, many of whom have been with us for well over 20 years now.

From AS 400 and Unix platforms, to client server systems of previous, to cloud based SaaS solutions for today, we are at the forefront of innovation. We have been using technology not just to change people's lives over this period but to improve their wellbeing too.

Last year we launched our revolutionary new blockchain platform, Reganto, as a truly game changing document management platform. We have already extended the platform to serve verticals like government bodies, universities, multinational companies, banks, and financial institutions here and internationally.

I genuinely believe we can rollout and deploy this technology and our Solution very quickly to authenticate vaccinations provided to all UK citizens. Our revolutionary blockchain platform is already built for such use.

We are also trying to communicate with other countries to offer the same solution. I would be very keen to receive support from any our Government bodies that can direct me to reach out to other countries like EU member states, USA, Canada, Australia, India, Brazil, Mexico.

Any support on this matter from yourself will be of immense help to me to open conversations about our Coronavirus (COVID – 19) Vaccination Certificate Passport.

### Contact:

Please contact me, 5.1.2e 5.1.2e, 5.1.2e Wealden Computing Solutions at:

Email 5.1.2e @wealden.net

Mobile: 5.1.2e

Or 5.1.2e

Nova South, 160 Victoria Street, London. SW1E 5LB.

I look forward to receiving your direction and support as to who we can reach out to urgently to discuss our solution. Many thanks.

## Kind regards
