

VACCINEGUARD

RELIABLE COVID-19 RESPONSE

AWARD-WINNING DIGITAL PLATFORM TO CURB COVID-19 PANDEMIC

1. Generates globally valid privacy-preserving digital certificates as a proof that a person has been vaccinated against COVID-19, has recovered from COVID-19 or has a negative test result
2. Links vaccine supply chain information with vaccinations in clinics
3. Manages vaccination campaigns for patients (onboarding, dose timing etc)
4. Provides real-time insights on vaccination uptake for public health authorities

VaccineGuard is digital platform that connects the different participants in the vaccine ecosystem. This includes vaccine manufacturers, hospitals, public health authorities, certificate providers, wellness app providers, citizens, border guards, vaccination program managers, and insurance companies. By enabling these participants to share data and verify its authenticity across organizational boundaries and international borders, VaccineGuard enables real-time insights, pharmacovigilance, counterfeit detection and many other benefits enabling a faster and reliable pandemic response.

GOVERNMENTS	CITIZENS	MANUFACTURERS
<ol style="list-style-type: none"> 1. Quick info on distribution and vaccinations 2. Authentic vaccine supply guarantee 3. Global vaccination data interoperability 	<ol style="list-style-type: none"> 1. Convenient cross-border travel 2. Transparent access to authentic vaccines 3. No personal information sharing 	<ol style="list-style-type: none"> 1. Real-time reporting from last mile 2. Early counterfeit and diversion warning 3. Reliable post-market quality monitoring

VaccineGuard can be implemented on-premise with APIs for integration into existing solutions. It can also be delivered as software as a service with zero systems integration required for vaccine manufacturers, public health authorities and care providers.
