Dear colleges,

Next week we will have our first journal club to discuss new and relevant Covid-19 literature. Every time we will discuss an up to date article or topic. We start with a short summary of the paper, some basic principles, and with each other we will try to create new ideas and improve the current research we are doing. This will be fun!

The first meeting will be on Monday 15the 12:00 by Webex and we will discuss the attached pre-print article. The meeting and discussion will be improved if we all read the article, prepare some questions, comments (don't hesitate to ask everything you don't understand).

For the first meeting I will give a short introduction/summary of the paper attached.
