Tholen, 17 March 2021

Dear Sir/Madam,

In order to address the current public health crisis, we are actively looking for incremental sourcing opportunities for COVID-19 vaccines.

I've facilitated together with the Ministry of Health, Welfare and Sports, of The Kingdom of The Netherlands, the procurement of PCR tests, ventilators, masks and other related products, leveraging my international network with pharmaceutical companies and governments, from my previous capacity as European Managing Director for GE (General Electric, healthcare and technology divisions).

We would appreciate your Letter of Authorisation (or similar) from the manufacturer along with verifiable information regarding factory location, production lines and corresponding relevant EMA approval certificates.

Also, please provide us with your concrete proposal and business offer; a proposal should at least contain all relevant business elements, such as quantity, delivery terms, shipping location, payment terms, price, packaging details, etc.

An SGS inspection or equivalent check will be part of the process. Looking forward to your response.

Yours sincerely,

5.1.2e
