Hi [REDACTED]

As we discussed in our last meeting, I checked the code and finally found an error in the step of evaluating importance weights.

The attached file is an updated report. I included Janssen vaccines in this simulation as suggested. For the detailed methods, I'm still trying to finish the first version of a manuscript. I will send it to you soon after it's ready. (I understood that my part will be included in the unit's report in the next round, so this email is just to update you the status.)

Hope you have a great evening!

Best,

[REDACTED]
