Onderwerp: Urgent: guidelines for interoperable certificates on COVID-19 recovery

Dear Member of the Health Security Committee,
Dear colleagues,

The eHealth Network is in the process of urgently adopting the attached guidelines for interoperable certificates on COVID-19 recovery.

On specific decisions of a public health nature, the eHealth Network is requesting the input of the Health Security Committee, namely on the three points below:

- Accepted use of RADT (provided it is in the HSC list of approved RADT) for the initial positive result, for the purposes of establishing recovery time;
- Validity of the recovery certificate starting from at least 20 days following the initial positive test result;
- Validity of the recovery certificate limited to 180 days following the initial positive test result.

We would be grateful if you could send us your feedback, specifically stating if you are in agreement or disagreement with the proposed points, by **Monday 10 am**.

To facilitate the process, Members are encouraged to liaise with their colleagues in the eHealth Network.

Thanking you in advance.

Kind regards,
HSC Secretariat
